

SPECIFICATION:

P. 1 Delete the CROSS-REFERENCE TO APPLICATIONS on page 1 as there is no additional pending

applications or patents related to this one.

P.1 Add patent US Pub. NO.: 2003/0,096,642 as prior art.

P.1 -6 In Background and description mention prior art of 2003/0,096,642 A1

P.1-6(Insert on page 1, as paragraph 5)

"On the previous art there is a holster that has the ability to function as a solar charger, charge from the solar unit transfers to the phone from the bottom interface from units 105 and 405 so that the charging unit can be considered detachable or an accessory to the phone instead of apart of the phone. The charging system proposed in this patent needs no connection to the bottom interface from the external surface but is inherent within the system as a whole, creating 1 unit. This is done by the placement of the photovoltaic cells upon the surface of the cell phone or on the surface of the battery attached to the cell phone. This has the affect of reducing parts needed for solar charging. Parts no longer need as illustrated in the prior art are 300, 103, 104, 206 501, 502, 205 105, 204, 203 and 201. By simplifying the idea to 2 units only, 208 and 101 and integrating the charger unit within 101 through replacement of the photovoltaic cells this makes obsoletes the units 105 and 405. This ultimately forgoes the need for a separate device, in this case a holster and also allows for charging without the need for a battery.

P 1 - P8 Change the spacing to double spacing.
